

* npm i nodemon -D
↓
dev dependency

now in package.json

"start": "nodemon index.js"

* Process.env.PORT

whichever port is empty run our website there

* app.get

whenever I hit the server I need to get something from the server

* res.status(200).send("Running");

```
app.get("/insta", (req, res) => {  
  // res.status(200).send("Hello World");  
  const insta = {  
    userName: "anurag",  
    follow: 1,  
    followr: 20,  
  };  
  res.status(200).send({ insta });  
});  
app.get("/linked", (req, res) => {  
  res.status(200).send("Hello World");  
});
```
