

## # Tailwind

\* first design for small devices and then for bigger screens

```
class = "px-8 padding on x axis py-8 padding on y axis drop-shadow-lg bg-white font-bold"
```

\* scale: to increase the size

```
* drop-shadow-[2px 2px 2px gray, -2px -2px -2px white]
```

outer shadow                      inner shadow

\* mt, md, ml, mr  
margin-top / -down / -left / -right

\* every single style will need hover

eg: hover: bg-white text = blue - 500 ✗

hover: bg-white hover: text = blue - 500 ✓

① Replicate vs-code Website using Tailwind only

\* Netlify, Vercel
