HOF → Higher order Function
   callback : Function is calling a function

* HOF : Take other function as a ==parameter== or ==return==
==a function== or a value. The function passed as a parameter
is called callback.

Example

```
* Function a () {
      console.log ("Hi");
  }
  Function b () {
        a ();
  }

  b ();

* const callback = (n) => {
     return n ** 2
};
 Function cube ( callback, n)
     return callback (n) * n;
}
 console.log ( cube (callback, 2));
```
Output : 8

For Each

```
const arr = ["hey", "hi", "hello", "Namaste"];
arr.forEach (myFunc);
function myFunc (val) {
    console.log (val);
}
```
